ACC 202: Introduction to Managerial Accounting

An introduction to managerial accounting methods for evaluating performance including cost accounting, budgeting, break-even analysis, ratio analysis, standard cost systems, and reporting for internal decision making.

Credits 3
Lecture Hours 3
Prerequisites
ACC 201 with “C” or better.

Course Outcomes

• Analyze, record, and report equity and long-term liability transactions related to partnerships and corporations from both an issuer and investor perspective using GAAP.
• Prepare and analyze the Statement of Cash Flows.
• Analyze financial statements using horizontal analysis, vertical analysis, and financial statement ratio techniques.
• Describe the concepts of managerial accounting and explain how they are applied to various business models.
• Analyze, record, and report the activities of a manufacturing company using process cost, job order cost, and standard cost accounting systems.
• Prepare information and reports that may be used by management to plan, direct, motivate, and control a business using Cost-Volume-Profit analysis, incremental analysis, and operational and capital budgeting techniques.
